

NWNS Global Coverage

Last updated : 10 June 2010

Countries where NWNS can provide network implementation services using local or regional associates and partners.

Through its global network of associates and partners, NWNS has instant access to support in more than 100 different countries. Not (yet) having a local partner active in a certain country or region can have multiple reasons as for example:

- Economical not feasible;
- No business need, or;
- No qualified support available;

It however does not mean that NWNS cannot provide support in countries where NWNS has no local partners available. On the contrary, NWNS can either decide using its own technicians and engineers or choosing for dispatching a partner from a neighboring country.

If your business requires our support, NWNS will make sure this demand is fulfilled, anywhere, anytime.

Authorizations / Permissions / Licenses

Many of the services NWNS implements on behalf of its customer require a permission to operate. This is called an operation license. Such a license is typically issued by the local authorities.

To enable legal network implementation, NWNS is prepared to assist Customer in obtaining all the necessary licenses and permissions. Where needed and where possible NWNS can prepare, file and administrate all (VSAT) license applications, typically on behalf of the Customer or end-user.

Alternatively Customer or end-user can use – under conditions - NWNS's license or benefit from special agreements between NWNS and licensed network providers in for example:

- Algeria
- Angola
- China (restrictions apply)
- Ivory Coast
- Kenya
- Kyrgyzstan
- Mozambique
- Nigeria
- Pakistan
- Tanzania
- UK

Please note that the procedure for obtaining all the necessary permissions varies from country to country and can be difficult, timely and costly. A license or permission can never be guaranteed.
